(54) INTERFACE DEVICE FOR IMAGE FORMING DEVICE

(57) Abstract:

PURPOSE: To set a job mode without operating the inputting means of an image forming device or directly inputting necessary data by a user carrying an ID card.

CONSTITUTION: This device is equipped with a means 2 which receives ID code information returned from a transponder 11, a means 3 which decodes a prescribed ID code from the ID code information received by the transmitting and receiving means 2, a means 4 which stores history data corresponding to the ID code, and a priority job discriminating means 5 which discriminates a priority job from the history data corresponding to the decoded ID code, and designate a job mode to an image forming device job mode setting means 6. Thus, the desired job can be set only by performing access to the picture forming device by the user.

LEGAL STATUS

[Date of request for examination]

15.07.1999
[Date of sending the examiner's decision of rejection]

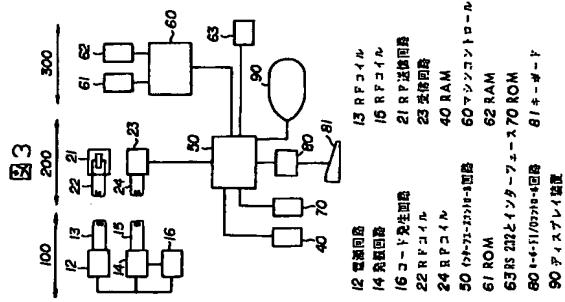

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
[Date of final disposal for application]
